DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The IDS(s), filed 2/7/06; 11/29/06, has/have been considered in full.

Oath/Declaration

3. The Oath/Declaration is acceptable.

Drawings

4. The drawings, as originally filed, are acceptable as formal.

Claim Rejections - 35 USC § 112

- 5. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 6. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, "joining while aligning" is indefinite since the joining process is mechanical and the shafts would be aligned prior to joining.

Claim 1, "by way of the plurality of balls" is indefinite since it is not clear how the balls join the shafts.

Claim 2, "the plurality of loaded balls" lacks antecedent basis. Applicant must review the claims in their entirety to ensure all recitations have the proper antecedent basis.

Claim 3 is indefinite. It is not clear how this defines the size of the coupling. The effective number of turns of the nut results in a number. There are no dimensions associated with this result. See also claim 9.

Claim Rejections - 35 USC § 103

- 7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 8. Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rosenthal (5,069,076).

Rosenthal shows a screw (4) and nut (48) which have complementary threads for translation when there is relative rotation between the screw and nut; a coupling (33) which is intended for connecting the screw (4) to an extension piece (column 5, lines 18-19); the coupling sleeve has radial holes or slits which allow lubricant to flow in both directions.

Art Unit: 3656

But Rosenthal does not show a screw and nut device which utilizes balls in the interface between the screw and the nut.

Nagai et al. (6,446,520) shows a screw (4) and nut (6) device which has a plurality of balls (14) loaded in the interface between the screw and the nut and a recirculation pathway (18) for returning the balls to the beginning of the recirculation path.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the ball type screw and nut device of Nagai et al. into the non recirculating screw and nut device of Rosenthal since these two types of screw and nut devices are known equivalents and the selection of either of these known screw and nut devices would be well within the level of skill in the art. Further, the selection of the ball type screw and nut device reduces friction and is therefore the preferred selection when cost is not a concern.

Conclusion

9. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.

Certificate of Mailing

Art Unit: 3656

I hereby certify that this correspondence is being deposited with the United States Postal Service with sufficient postage as first class mail in an envelope addressed to:

Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450	
on (Date)	
Typed or printed name of person signing this certificate:	
Signature:	-
Registration Number:	
Certificate of Transmission	
I hereby certify that this correspondence is being facsimile transmitted Trademark Office, Fax No. () on (Date)	to the United States Patent and
Typed or printed name of person signing this certificate:	
Signature:	-
D 11 8 N 1	

Please refer to 37 CFR 1.6(d) and 1.8(a)(2) for filing limitations concerning facsimile transmissions and mailing, respectively.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David M. Fenstermacher whose telephone number is 571-272-7102. The examiner can normally be reached on 10:30-7:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Ridley can be reached on 571-272-6917. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
